"The Crappie Catcher" INFORMATION

SAFE BOATING TIPS

Obey the basic "Rules of the Road", among which are the following:

- 1) Keep an alert lookout for other craft, swimmers, skiers and warning buoys or markers.
- 2) When overtaking another boat, the boat that is being passed has the right-of-way. Keep clear when passing.
- 3) When meeting another craft head-on, keep to the right, just as when driving on the highway.
- 4) When boats are approaching each other at an angle, and their paths are going to cross, the boat on the right has the right-of-way, just like it is when cars approach an intersection. The one on the right has the right-of-way. (See illustrating diagram)

The diagram shows the danger zone when your boat is meeting another craft which approaches on your starboard side. You must yield the right-of-way to craft which are headed into the danger zone.

- 5) Use whistle signals whenever there is a possibility of collision with an approaching boat; One SHORT BLAST means Pass on my Port (left side); TWO SHORT BLASTS mean Pass on my Starboard (right side); FOUR or more BLASTS indicate Danger Signal; ONE LONG BLAST is a warning signal; THREE SHORT BLASTS mean Engine in Reverse.
- 6) Watch the weather, check with the Weather Bureau, learn the Coast Guard Storm Warnings. (See illustration)
- 7) Sailboats always have the right-of-way over motor craft, regardless of how the vessels approach each other. Always yield to sailing vessels.
- 8) Be extremely careful with gasoline. Whenever possible, beach your craft when refilling fuel tanks. Fill gasoline stoves and lanterns over the side of your craft so that spillage will go overboard rather than into your boat.
- 9) Distribute weight evenly in your boat in a manner to prevent listing (leaning to one side), as well as to prevent bow heaviness, or stern heaviness.
- 10) Never overload a small craft. Maintain adequate freeboard (the distance from the waterline to the top edge of boat siding.)
- 11) Keep fire extinguishers and life jackets in good condition, and keep them in an easily accessible location.
- 12) Children aboard should wear life jackets at all times.
- 13) When navigating in rough water, throttle down and head into the waves at about a 45 degree angle. DO NOT head directly into the waves if your boat is less than 19 feet in length.

NAUTICAL TERMS (Sailor's language)
ABAFT or AFT--When describing the location of an object aboard--it means toward the stern, or back end of boat.
ASTERN--Outside of the boat and behind the stern.
BOW--The forward part (front end) of boat.
BEAM--Distance across the boat, from port

It took a marathon three-hour playoff for Los Angeles' RONNIE "FAST EDDIE" ALLEN to defeat Brooklyn's CISERO MURPHY, Straight Pool Title Winner in the Stardust Open Pocket Billiards Tournament, for the Round Robin Over-All Championship--MURPHY is a Soul Brother.
