Your professional hairdresser knows the answer...

### Was haircoloring first done in Africa?

Centuries ago in Africa (before it was explored by Europeans) beautiful black women used herbs and other ingredients to change the color of their hair. It was one way to complement their dark rich complexions... to accent their natural warmth and beauty. Whether or not Africans were the first to use this method, no one is sure. Yet, they are among the first in terms of recorded history to go through the then-tedious process of coloring their hair.

Today changing your haircolor can be as quick and as brief as a visit to your professional hairdresser. That's because many professional hairdressers use Miss Clairol® Hair Color to lighten hair, to make slight color changes and to cover gray. Hairdressing experts know that exotic blacks and browns are generally gorgeous for darker skin tones. Golden or red shades are stunning for lighter tan complexions.

Today black pride brings you closer to the cultural ways of your African heritage. Haircoloring is a part of black history too. Ask your professional hairdresser about changing your hair color with Miss Clairol... and be more beautiful than you already are.

The tongue is a smouldering fire, and excess of speech a deadly poison. Material fire consumeth the body, whereas the fire of the tongue devour-eth both heart and soul. The force of the former lasteth but for a time, whilst the effects of the latter endureth a century. -Baha'u'llah
