YOUTH ADVISORY COUNCIL

The Mayor's Student Youth Advisory Council with the assistance of the City of Las Vegas Youth Affairs Office has compiled a list of clubs, organizations, and services available to Southern Nevada Youth.

With summer almost over, the younger family members will probably be asking how they can get involved in a youth group.

The 1974-75 Youth Affairs Directory has over 160 separate listings in 20 categories including traditional youth organizations, recreational departments, centers, hobbies, sports, counseling, health services and places of interest, to name a few.

The Youth Affairs Directory is available to the public at the information desk at City Hall or by calling 386-6211.

God is hope. God is now.

MARCH OF DIMES WALK-A-THON

When thousands of persons march to raise money for the March of Dimes fight against birth defects, months of planning are necessary-down to the last band-aid.

During a recent organization meeting for the November event, more than thirty (30) enthusiastic volunteers met to discuss a bigger and better walk, according to Campaign Chairman Mike Cherry.

Each year business and community leaders join young people from Southern Nevada schools to walk or run the distance, sponsored by neighbors, friends, associates and businesses.

Chapter Chairman Seymore Brown suggests anyone wishing to help with the Walk-A-Thon are welcome to attend the next Campaign Advisory Board meeting on September 4th at the March of Dimes office, or call 382-4453 for information.

**Why
talk about
a heat pump
in the middle
of
summer...**

when all you want to be is cool.

Simply because the heat pump is the most efficient, low-cost heating and cooling system on the market. In partnership with good insulation, the heat pump means efficient energy management, the year-round. In winter, it takes usable warmth from outside air and pumps it inside to heat your home. And in summer, it works in reverse and pumps the heat out of your home.

The reason the heat pump is the most efficient heating and cooling system is because it produces two or more units of heat for each unit of electricity required to operate it. This is the kind of efficiency we need to meet the energy challenge!

So, if you're considering a new home, or are converting your present system, look into the advantages of the heat pump. Your heating-cooling contractor can give you all the details.

Or your Nevada Power Customer Technical Services Department will be glad to tell you more about it.
