

Operation Life

begin again!

from Welfare to Economic Development

Public Policies and laws in the areas of Jobs and Economic Development

LT GOVERNOR MERVYN DYMALLY of California and CAROL BURRIS Director, Women's Lobby Washington, D.C. will be guest speakers

Saturday, April 23rd - 7:30 p.m. ROYAL INN HOTEL - 305 Convention Center Drive

This project sponsored by OPERATION LIFE and made possible through a grant from the Nevada Humanities Committee

**Starting May 3
you're going to have
someone you can
talk to
in City Hall.**

It's about time.

**Hubbard
For City Attorney**

**RUBY
SAYS**

First, I want to tell everyone to come to the Operation Life Conference that will be held April 23rd (Saturday) at the Royal Inn Hotel at 7:30 p.m. The conference will cover such topics as full employment and community economic development. The Honorable Lt. Governor Mervyn Dymally of California will be the main speaker along with Carol Burris, Director of the National Women's Lobby from Washington, D.C. . . . Lt. Dymally is active in community Development, not only in California but in the southwest and is familiar with the conditions of West Las Vegas. He will be an excellent person to give insight to the workings and processes of economic development. Carol Burris, a dear friend of mine, is a dynamic and outspoken lady that I'm sure everyone will also enjoy. This duo will make an exciting conference and I hope everyone comes to greet them and hear what they have to say. Remember, Saturday, April 23rd at the Royal Inn Hotel at 7:30 p.m. Everyone is welcome to attend and should come to learn what can happen to their community.

Something has happened at EOB that I quite don't understand. Two ladies, Ms. Edna Marshall and Ms. Fannie Mae Owens, part time receptionists for EOB for 7 years have been let go from their jobs. It seems that they moved to better homes, and that was enough to let them go from their jobs. Fannie Mae was recently off welfare and it seems that losing her job will force her to return to the welfare rolls. Both are low-income and need the little change they get from a part time job to survive. They should be commended, not let lose. I admire any woman who is able to go out and seek a job, hold that job for seven years, in an effort to better their own lives. It is a cruel jest to hurt a handicapped person who has given a great part of their life to a job, and I just don't understand it.

OPERATION LIFE Child Care Center has openings for children in North Las Vegas. Call 649-3570 if you need good low or no cost day-care while you are working.

Remember to have your child seen at the Jackson Street Clinic if they are under 21 years old and have a current medicaid card. Call your Caseworker and tell them you want your child checked-up at the Jackson Street EPSDT Center. They also give immunizations. I cannot stress the importance of having your children checked-up. You would be shocked at how many children of our community have some health problem that they need to take care of before it is too late. It is a matter of health for your child and well worth the few minutes it takes. CALL 648-2886.

I keep stressing the importance of high nutritional foods also, and I urge you to have your child receive milk, cheese, eggs, fruit juices and other good foods. If your child needs these foods, is under 5 years of age, and has a medicaid card, come to Operation Life at 400 W. Jackson or call 648-0012.

SEE YOU AT THE ROYAL INN ON THE 23RD!
JUST THE FACTS

of fuel due to the natural gas shortage in this country.

The natural gas problem has been compounded because some electric and gas utilities companies, chief fuel, natural gas, is being allowed to run short. These utilities companies are moving away from the use of natural gas. Many of their new energy generating plants will run on coal or nuclear energy.

These plants are much costlier to build than natural gas plants so will force higher home heating cost on to the consumer. Exxon, adding insult to injury, will, without Congress passing an oil divestiture act, be there to hike up the home heating bill still further when the utility companies come calling for nuclear fuel.
