

WESTSIDE COMMUNITY COMPREHENSIVE DEVELOPMENT PLAN

As a vital and integral part of our Overall Economic Program and Plan, we have to address ourselves to the issue of residents in our project area not being afforded the opportunities of receiving financial support from our various banking institutions to provide improvements within our area. Improvements, such as, outside cosmetics of homes, rewiring of houses and insulation and weatherization, bringing our homes up to standard, according to the housing codes; painting and certain other beautifying needs along with possible expansion or room additions would most assuredly enhance the community's entire facial uplift.

Persons can sit on the outside and speak in a negative manner about the Westside of Las Vegas, but little do they know or understand that without the conduits for doors to be opened to us, the residents of West Las Vegas will always be traveling on a dead-end or a detoured route; with possibilities of disenfranchisement from first class citizenship and the direct mainstreams of life. Since many banks and dignitaries have alluded to the premise that the Westside is not worth the investment, they have disinvested us totally from the finances so sorely needed to help get us started — this is defined or called "Red-lining."

If the Westside Community residents are allowed to maintain various depositories, via checking and savings accounts at our local banks, then we should be able to seek out, apply for and qualify to receive loans for the improvements of our community and the betterment of ourselves as a people. If you are a resident of our project area, have ever applied for, and did not receive such a loan; or if you have applied for and received such a loan — for research purposes only — please fill out the attachment and return to:
