country, along with a host of Las Vegas residents and tourists will settle down at the Empire Room at the Landmark Hotel to witness this 5th Annual event.

Las Vegas is primed and ready to receive women and through the coordinated efforts of the pageant Executive Director Major Davis and directed by Jim Dixon plus the assistance of many talented Las Vegans, the pageant is destined to be the best ever.

Tickets for the Miss Galaxy International Pageant are now available at Larry's Sight & Sound and the ticket

box office at the Landmark Hotel. They will be \$8.00 in advance or \$12.00 at the door

very early age at the Flower formation on how to help rather than the menial Hill Baptist Church in Smithville, Texas.

He finished high school in Smithville and attended Bishop College in Marshall,

Texas. He earned his BA degree at Conroe Normal Industrial College in 1945.

He was called to preach, at the age of 19, under the leadership of Dr. James N. Byrd of San Antonio, Texas. His first church was St. Mary's Baptist Church, San Antonio.

He came to Las Vegas in 1949 to pastor the Second Baptist Church where he worked for 27 years and eight months until his health began to fail. He came here from the St. Paul Baptist Church in Paris.

He was a member of the Masonic Lodge.

Rev. Coleman is survived by his wife, Ida Mae those lovely young Coleman of Las Vegas; two daughters, Mary L. Hodges and Myrtle K. Coleman, both of Las Vegas; two sisters, Corine Stuart of Illinois and Maggie Deary of Texas; three brothers, Lonnie Coleman of Oklahoma, Hezekiah Coleman of Las Vegas and the Rev. Willie James Coleman of Michigan; four grandchildren, and four great-grandchildren.

Services were held in the Second Baptist Church with the Rev. Willie Davis officiating. Burial was at the Eden Vale Cemetery.

Regent June Whitney

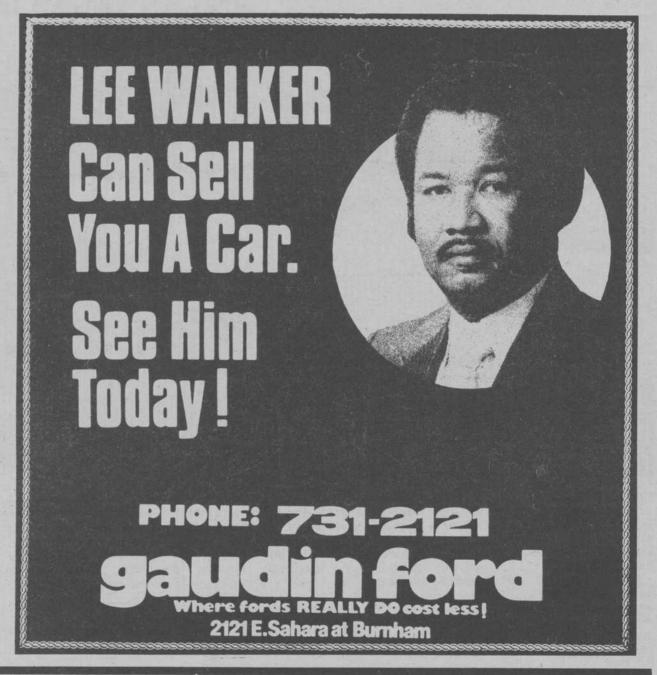

Regent June Whitney, said schools in the area to be qualified for the 1912. He was baptized at a are waiting for in- more qualified positions

train people to take over the jobs.

"Hopefully we will have the proper training tasks that we had at the Nevada Test Site," she said.

Brig. Gen. James McCarthy outlined Air Force and administration plans for

George Oslev. secretary - treasurer of the Labors Local 872, said the union supports construction of the project "with its main base in Southern Nevada."

LOS ANGELES-One of the nation's most distinguished blatticidists, holder of 15 patents on chemical compounds, has revealed that the White House was, un-til recently, invaded by swarming hordes of cockroaches.

Alan Brite, president of Copper Brite Inc., major producer of chemical com-pounds for home and industry, told Monorth in an exclusive interview that the White House household staff was panic-stricken over the fact that the president's residence was infested with vermin

Staff members called on a representative of Brite's firm for help. Not only was the staff in constant dread of a surprise appearance by the loathsome creatures at state dinners and other formal affairs -sometimes honoring royalty-but technicians were reluctant to work on sensitive electronic communications gear in

the basement.
"The place was positively overrun with

the disease-spreading, lightning-fast creatures," Brite said. "Eventually the White House did rid itself of the pestilence, thanks to a product I developed called Roach-Prufe.

"It's the neutron bomb of insecti-cides," Brite said, with evident pride. "Within a week of application not a single roach was left in the nation's most prestigious residence. We had met the enemy and it was ours."

TOO' GOOD A JOB

Brite, a maverick and apostate in the chemical and extermination industries, has for nearly 12 years been waging a battle against the established household insecticide distribution cartel. Supermarkets and professional roach exterminators refuse to handle his Roach-Prufe product. Brite claims it's because Roach-Prufe does too good a job.
"Apply it once and roaches are gone

"Obviously, supermarkets and extermi-nators won't sell it. They want repeat business. To sell Roach-Prufe would be to put themselves out of business."

Brite's other products, including the well-known Copper Brite, have been dis-tributed by supermakets for 30 years.

"The Department of Agriculture, General Services Administration, New York City Board of Health, UCLA and numerous other non-profit institutions and agencies have tested, approved or recommend-ed Roach-Prufe," Brite says. "It is effective. But the extermination industry will have no part of it. Can you picture Goodyear or Firestone marketing a tire that would never wear out?'

Roach-Prufe's chief ingredient is orthoboric acid, one of the few chemical agents known to kill roaches. Roaches are among the hardiest creatures ever to have lived. They can withstand atomic radiation, survive without food or water for 25 days,

and function even after decapitation. Roach-Prufe, a powder, is scattered around areas where roaches crawl. It sticks to their shells. Roaches carry it to their fellows. The acid is absorbed through a roach's shell in 24 hours and within a week a whole colony is wiped out.

Thanks to articles on Roach-Prufe in The Washington Post, Miami Herald, Moneysworth and other periodicals, over half a million cans have been purchased by consumers in the last six months, Brite claims. They have been distributed, to a large extent, by door-to-door salesmen.
