

BRAIDS FOR SPACE TRAVEL

For those of you who thought braids were only for those ladies who go along with any fad that comes along (soon to be forgotten), I'm afraid you're wrong. Braids are stronger than ever this season.

This ancient hair design created by women of African Tribes is indeed a unique form of art and a celebration of African culture. Women all around the world have discovered the beauty and regal appearance braids reflect and, for many women, this attractive hair design has become a definite lifestyle and symbol of natural beauty.

Alison Palm, well-known hair artist around the country introduces "Braids For Space Travel." Such styles as NUBIAN GOLD — three layers of braids accented with 24 karat gold plated beads and CURL SWIRL — swirls of braids wrapped with gold and metallic cord, are only a few of Ms. Palm's unique creations for the fall season.

For more information on how to contact Ms. Palm, call now at (213) 670-4105 and let her design a style created for your personality and natural beauty.
