POSITION PAPER

To Whom It May Concern:

In view of recent publicized information concerning the alledged plight of the Black community and announcements by specific community leaders and groups of a forth coming March 1, 1983 boycott against the promotion of tourism in the Las Vegas area, we, under the auspices and umbrella of Nucleus Plaza, Inc., and The Nucleus Associates, Local Development Company have found it imperative to respond to these matters by way of a "Position Paper" in indication of where we stand relative to this situation:

Let it be known that although Board members of the Nucleus organization have found it necessary to repeatedly meet on occasion with others to discuss overall community problems and progress, in an effort to facilitate movement and to identify areas of further concern, these concerns have always been akin to "Community Development" only - specifically to increase the employment base, both in and outside the Special Impact Area; to promote growth and prosperity relative to the health and welfare of small business enterprises and to influence overall neighborhood revitalization.

Also, that while Board members and others involved in this consortium stand for a positive social relationship throughout the network, we have never promoted upheavel or turmoil, neither have we offered political threats and blackmail in order to reach desired goals.

Hence, it is the intention now and in the future to involve ourselves in the total effort toward "Community Development", one that is felt to be the proper resolution to social greivances and the mainstay, in a procedure to better the welfare of those communities within the Special Impact Areas.

This is our philosophy and will remain our philosophy throughout. Therefore, publication of any opposing statements or practices, to include this organization, is in false application, and is thus circumscribed without proper permission or association.

Respectfully,
Leonard C. Brown
