

A Kid's Opinion

By Che' Jones

As you know, for the last month or so the Jackson's "Victory Tour" has been breaking records and also has been headline news.

In January of 1984 superstar Michael Jackson and his brothers Jackie, Jermaine, Tito, Marlon and Randy filmed two commercials for Pepsi-Cola. One featured Broadway's star of "The Tap Dance Kid" and the other was a concert scene. As you know,

Central Telephone-Nevada customers have until Sept. 30 to either purchase their leased telephones or return them to the company, Centel's business office manager Nield Mont-

gomery said. Mandatory phone ownership under federal deregulation becomes effective at the end of the month, Montgomery added. Since the phone own-

ership program began in place. February, more than Centel will keep its 250,000 telephones have Southern Nevada been purchased in offices open Saturday.

Michael's hair caught on fire.

During Michael's recovery, everyone was skeptical about the tour until Michael said, "It's back on."

The Jacksons' stage is the largest ever made for a pop concert in music history. It weighs tons and it's at least as long as a football field.

During this "it's on; oh! it's off" period, it got real hectic, but then it happened — the tour started and the Jacksons have made millions so far. Right?

Wrong! The Jacksons have lost an estimated \$200,000 per concert. They cancelled some concerts and the Forum is suing the Jacksons for cancelling out there. They said they won't perform anywhere where it can't seat at least 46,000 people, unless they can have 3 or 4 nights. That's why they're considering Las Vegas — because they can have it at least 3 or 4 nights.

Maybe there are too many back seat drivers.
