Opportunities Industrialization Centers of America, Inc. (OIC/A)
Progressive National Baptist Convention, Inc.

SUSPENSION

“From fully independent four wheel suspension on Ford Tempo to computerized air suspension on Continental Mark VII, we're giving you a better feel for the road.”

Rodney M. Jordan
Product Design Engineer

Ford Tempo's front end upper strut mounts channel mechanical hydraulic forces to fine-tune ride and handling quality.

Ford Motor Company is the only major American car company to offer fully independent four wheel suspension on most of its smaller, less expensive cars. Ford Escort, Mercury Lynx, Ford Tempo, Mercury Topaz, and Ford EXP all offer the comfort and sure handling of this advanced engineering development.

Ford Tempo's rear suspension longitudinal tie rods allow for “give” which reduces the effect of hard impacts.

Continental and Continental Mark VII are the only luxury cars in the world with computerized air suspension.

From Tempo to Continental, sophisticated suspension systems like these are just part of the quality that goes into every car Ford makes. Whether you're behind the wheel yourself, or just a passenger, you'll feel that quality.

On Mark VII, nitrogen gas-pressure front struts and rear shock absorbers are matched to variable rate air springs illustrated here, to provide a unique blend of ride and road handling.

Quality is Job 1.

Get it together—Buckle up!
