### Off With Their Heads! Students Demand Justice

**N'YORK CITY**-You've doubled up on me this time, between Sammy Davis, Jr.'s fling and flare at Harrah's Mariner in "The Other Atlantic City" and the Willie May's "Say Hey" Foundation Celebrity Tournament at Briar Hall Country Club, you have had little time to become acquainted with this typewriter. However it's a

good thing I am on speaking terms with time and can inform your loyal readers that you would have pen-point the fact that Ango Abduhalli, vice chancellor, Nigeria's Ahmadu Bello University is facing criminal charges along with several riot policemen who may be tried for murder. All is an out growth of a student uprising in May during which campus leaders claim that 19 students were killed and 20 injured by police using tear

gas, live and plastic bullets ammunition. Zaria's government, headed by General Ibrahim Babangida, disputes these numbers and defends the police who had to use force in order to break through roadblocks and dismantle barricades to contain the disorder. The findings were made public by a commission appointed by the General to quiet a public outcry following the incident. The entire event was the opening of an old wound dating back to '78 protest march during which eight students were killed by police. The May '86 event was to commemorate their death. It was sanctioned by

the government. However during the demonstration several women's dorms were allegedly occupied. That resulted in the expulsion of two student leaders. This action drew immediate widespread criticism from faculty members who were already hot under the collar over the administration's proposed cuts in their benefits. Encouraged by this group, allegedly, the students became more militant toward the administration and started constructing a fortress which is said triggered the calling out of the Nat'l police.
