

THE ULTIMATE VISION: EYES FOR THE BACK OF YOUR HEAD.

To see some accidents coming, you'd have to be born with radar. But you're not, so GM is working to give you the next best thing. Radar for your car. The option to "see" all around you, all at once. It's called Obstacle Detection. Just one of the many safety features GM is developing for cars of the future.

Obstacle Detection will operate by sensors strategically placed all around your car which will sense and warn you of obstacles you're approaching, giving you a chance to avoid them.

At GM, we can't prevent all accidents from happening, but we want to help you steer clear of as many as we can.
