

*For Bill Demby, the difference means
getting another shot.*

When Bill Demby was in Vietnam, he used to dream of coming home and playing a little basketball with the guys.

A dream that all but died when he lost both his legs to a Viet Cong rocket.

But then, a group of researchers discovered that a remarkable DuPont plastic could help make artificial limbs that were more resilient, more flexible, more like life itself.

Thanks to these efforts, Bill Demby

is back. And some say, he hasn't lost a step.

At DuPont, we make the things that make a difference.

Better things for better living.
