## We issue our letters of approval more often than any other lender.

If you need to borrow money, it pays to apply with First Interstate Bank of Nevada.

On any given business day, we approve more than 200 consumer loans. We also have over \$200 million to lend to Nevadans this year.

Those two facts alone would seem to indicate that nobody makes borrowing easier. But if you need more proof, consider these other benefits:

You can expect prompt service when you apply at the bank and wait for your answer. That's because we have the largest number of bankers making loans in Nevada. And because

we usually process applications in one banking day or less.

You can save 1/2% on the interest rate when you authorize automatic payments from a First Interstate Bank checking, savings, or market interest account. You can choose the monthly due date for your payments. And you can postpone a payment once every 12 months, no questions asked.\*

Finally, you pay simple interest. Which means you pay only for the days you use the money.

Before you buy that new car or dining

room set or vacation package, visit any of our 65 First Interstate Bank offices. I nobody says yes more often.

Nobody makes bank

\*Interest continues to accrue. Each month postponed is added to the term of the loan. 1/2% interest rate reduction and postpone-a-payment option are not available on real estate loans and revolving lines of credit.
