medical system is well known for its intensity and quality output. Dr. Martin adds a special zest to her vitae in her bilingual fluency in Spanish. This becomes practical when service is provided to their Hispanic customers, especially in the North Las Vegas office which is located in a densely populated Hispanic area.

Each member of the trio brings an assortment of experience and skill which prepared them, according to Edwards, for any medical dilemma that a patient might face. "With the three of us, we can bounce ideas off one another to find solutions," Edwards replied as she described the problem solving strategies of the practice.

The group also strives to provide patients with optimum service by rotating their schedules for patient availability. This, due to the unpredictable nature of child delivery, is a huge benefit for patients. Patients receive the same level of quality service and care from their primary physician or the shift physician, who might temporarily substitute. The doctors are registered at virtually every hospital throughout the city and nearly all types of insurance.

The group will sponsor a free health care seminar this Saturday, March 26, from 11 a.m. until 3 p.m. Free blood pressure checks, pregnancy tests, plus comprehensive health screenings will be provided at the North Las Vegas office located at 1703 Civic Center Drive, Suite #3. Further information can be obtained by calling 642-0686.

AFRICAN-AMERICAN HISTORY FACTS YOU SHOULD KNOW

By Gwen Walker
Thomas Fuller - "The African American Calculator" had an uncanny genius for mathematics. Born in Africa, and brought to this country as a slave to Alexandria, VA., Fuller could not read or write. He could figure sums involving billions in his head better than 99 out of 100 clever men could with a pencil.

He could rapidly give the diameter of the earth's orbit in inches despite interruptions. In a test to give the number of seconds in 70 years, odd months, and days, Fuller did it in 90 seconds, beating an educated white man with a pencil. The white man had forgotten the leap years. With a formal education Fuller would probably have been another Newton. He died Dec. 29, 1790 at age 80.

Louisiana had three African American Lieut. Governors: Oscar J. Dunn, C.C. Antoine, and PBS Pinchback, who later became Governor. South Carolina had two: Almzo J. Kansler and Richard Gleaves. Mississippi had one: Alexander Davis William P. Holland - won the first prize for speed and efficiency in lino-typing at the International Typographical Congress in 1914.
