

A physician typically will not order an ultrasound evaluation for someone who has no symptoms of vascular disease or osteoporosis. Life Line Screening® enables you to be checked for vascular disease or osteoporosis as part of your own personal prevention plan. Over 2.5 million people have participated in these non-invasive and painless screenings. This valuable information will help you and your personal physician quickly and inexpensively manage your wellness.

- State-of-the-art equipment is used with sophisticated color flow ultrasound technology.
- A board certified physician, who is fully insured and licensed to practice, reviews and confirms all screening results.

"Vascular screening programs for cerebrovascular disease, aortic aneurysms and peripheral vascular disease have proven their value in detecting previously unrecognized problems in many individual patients that could have resulted in significant illness or even death."

Robert J. Steele, M.D.

Board Certified Cardiologist, Cleveland, Ohio

"I participated in all three screenings and felt the staff was very professional, efficient and gracious. This certainly is a valuable service which I shall continue to provide to Laurel Lake residents and to the community for as long as possible."

Kathy Burmeister, R.N.

Director of Clinic Services, Hudson, Ohio

**1 Stroke Screening/
Carotid Artery
\$45**

Visualizes the buildup of fatty plaque in the carotid arteries which leads to stroke.

Procedure: The technologist applies an acoustic gel on your neck over your carotid arteries. A painless instrument, a transducer, will be moved around your neck to visualize the inside of the carotid artery.

**2 Abdominal Aortic
Aneurysm (AAA)
Screening \$45**

Visualizes the existence of an aneurysm (enlargement) in the abdominal aorta that could lead to a ruptured aortic artery.

Procedure: The technologist applies an acoustic gel on your abdomen and uses a painless instrument called a transducer to visualize the aorta.

**3 Peripheral Arterial
Disease
Screening \$45**

Screens for peripheral arterial disease in the lower extremities. Studies suggest an abnormal ABI may indicate peripheral arterial disease as well as a high risk of coronary artery disease.

Procedure: Blood pressure cuffs and a Doppler ultrasound probe are placed on your arms and ankles.

Complete Vascular Package (all 3 screenings) \$109

If you pay by phone, we accept these credit cards. We do not accept credit cards at the event.

Life Line Screening is dedicated to providing the highest quality imaging technology at an affordable rate. Our goal is to make people aware of an undetected health problem and encourage them to seek follow-up care with their physician. You will receive your results in 21 days.

Insurance Note: At the present time, Medicare does not cover the cost of these screening services. Life Line Screening does not file insurance claims.
