

Nevada Power[®]

More power to you.

In Nevada,
**solar
energy** is a
perfect fit.

It's about more than just keeping the lights on. It's also about looking for renewable energy sources. And let's face it, solar power is a no-brainer in a state with so much sun. So utilizing energy from the 64 megawatt Nevada Solar One Plant under construction in Southern Nevada will make perfect sense. For more about renewable energy, visit nevadapower.com/renew.
