Historical Note

The Environmental Protection Agency (EPA) was charged by Congress with developing public health and safety standards for radioactive material stored or disposed of in the potential repository at Yucca Mountain, Nevada. The EPA was designed to protect public health and safety, as well as the environment, for present and future generations. In 1995, after publishing a Federal Register notice, the EPA established an information docket designated as EPA Air Docket A-95-12 located in the main campus library at the University of Nevada, Las Vegas. The official public docket is located at the EPA Headquarters in Washington, D.C. The 2001 official docket for the Yucca Mountain standards is OAR-2001-0007 (formerly called A-95-12). The official docket for the final amendments to the Yucca Mountain standards is EPA-HQ-OAR-2005-0083.

Document Identification Number

A Department of Energy (DOE) tracking and retrieving document identification number follows the majority of reference citations. The purpose of these numbers is to assist the reader in locating a specific reference. Some references have more than one tracking number, designating multiple volumes or a series of documents that relate to the particular reference.

In an effort to ensure consistency among Yucca Mountain Project documents, the DOE has altered the format of the identification numbers in some of the citations. It is noted at the file level if references are cited differently in other series.
